6 You walk into a candy store and buy a soda and a candy bar. The total comes to \$1.10. If the soda costs \$1.00 more than the candy bar how much did you pay for the candy bar?

\$0.05  
35% correct

The first instinct is to say \$0.10 because \$1.10 is a dollar more than \$0.10. But if the soda is \$1.00 more than the candy the total would be \$1.10 plus \$0.10 for a total of \$1.20. So the answer is \$0.05.
